- **Notable Achievements** - Gates Scholar, Meredith Mallory George Scholar, Youth-Foundation scholar

## EXPERIENCE

---

### Life.Church YouVersion

Edmond, Oklahoma

*Frontend Web Development Intern*

*May 2021 - August 2021*

- Created the ability to like chat messages within the Church Online Platform, a livestreaming service used by thousands of churches globally.
- Used React, Typescript, CSS animations, and PubNub APIs to implement real time reactions.
- Gained important leadership and personal development skills through weekly development meetings.

### Virginia Consulting Company

Virginia Beach, Virginia

*Lead App Developer*

*June 2021 - December 2021*

- Technical Lead of a four person team developing an app for a Virginia consulting company.
- Implementing client app in Flutter and using Firebase's platform as a service for a backend.
- Created GitHub CI/CD pipeline for automatic backend deployment as well as code quality and test validation.

### Petit Development, LLC

Virginia

*Founder*

*August 2021 - Present*

- Founded LLC for creating open source applications as well as websites for small businesses.
- Works with non-profits to create professional website at no cost.

### Duke University CS Department

Durham, North Carolina

*Advanced Software Design Teaching Assistant*

*August 2021 - Present*

- Helps design course for students and make decisions on teaching topics and order.
- Develops videos to help students learn technical skills in Java and JavaFX.
- Mentors students in weekly meetings to help track progress and grow intentionally as software engineers.

## PROJECTS

---

### RefBible

[joshpetit/refbible](https://github.com/joshpetit/refbible)

- Developed Bible app in Flutter that allows users to save favorite verses and search verses by topic and context.
- Persisted user preferences and favorites in local storage and created APIs to retrieve bible texts.

### Colors

<https://colors.petit.dev>

- Designed website in Figma as a case study to practice creating enjoyable user interfaces and experiences.
- Implemented website with TypeScript, SASS, Next.js, and deployed to Vercel.
- Created Next.js API to generate files of custom size, color, and filetype to experiment with API route design.

### Collegiate Covid

<https://collegiatecovid.com>

*2020 DukeHacks Hackathon*

- Led team of four to build analytics website for covid metrics across U.S universities.
- Built backend in python to scrape statistics from college dashboards and post them to firebase.
- Used Javascript and React to display data from Firebase, deployed frontend to Firebase hosting.

## SKILLS

---

- **Languages** - Dart, TypeScript, Java, Python
- **Software** - Flutter, React, Firebase, Next.js, SASS, GitHub Actions, Tailwind CSS, Vercel
